## QUANTIFI <br> PHOTONICS

# Switch 

# AUTOMATED <br> OPTICAL SWITCH 

SPECIFICATION SHEET

Add optical switching capability to your test system with Quantifi Photonics' automated optical switches. The fast and reliable optical switch will enable automated sequential testing, saving time and streamlining your test procedures.

## Bidirectional

Our optical switches are bidirectional; use it in $\mathrm{N} \times \mathrm{M}$ or M $\times N$ configurations for superior versatility.

## Convenient park feature

The in-built park feature on applicable models provides the convenient functionality of an optical shutter.

High repeatability
High repeatability ensures that your measurements are reliable and consistent over time.

High durability, $>3 \times 10^{7}$ cycles

High switch lifecycle of 30 million operations ensures you get reliable hassle-free usage, for a long time.

## Wide coverage of operational wavelengths

One versatile tool to cover a wide variety of applications.

## Low insertion loss

Maximise your power budget with the low insertion loss.

## Polarization maintaining output

On the polarization maintaining (PM) models, the slow axis of polarization is aligned with the output connector key as per industry standards. The user may choose to use polarization maintaining (PM) fiber or standard singlemode fiber (SMF)

## Supports single and multi-mode applications

Available in either single-mode or multi-mode fiber options for a seamless integration into your setup.

## Wide variety of port configurations

Choose the number of ports and switching configuration to suit your specific application.

COHESION UI - GRAPHICAL USER INTERFACE

## Simple, intuitive control with COHESIONUI ${ }^{\text {m }}$

COHESIONUI makes it simple to control our PXI or MATRIQ instruments from a PC, tablet or smartphone.
Its cutting-edge design offers a sleek modern interface, cross device compatibility, customizable views and remote network access.

## STANDARD SWITCH CONFIGURATIONS

## The Switch is highly customizable.

It comes with a wide range of switch configurations, fiber types and connectors. If you don't see what you need, please contact us to discuss your requirements.

## Our expanding range of PXIe optical test solutions are used by customers in mixed-signal test and measurement systems, reducing complexity, lowering the cost of test and accelerating time to market.

- Multi vendor, open standard with over 2500 PXI modules available
- Advanced timing and synchronization capabilities across instruments
- Low latency, high performance processing and fast data throughput
- Design and build scalable, high channel count systems
- Small footprint and lower power consumption

## The MATRIQ series provides the same high-performance test capabilities of our PXIe modules in an compact benchtop design. MATRIQ instruments are simple to setup and easy to operate, making them the perfect choice for your optical lab or test bench.

- Same performance and control as our PXle modules
- Plug and play with USB or Ethernet connectivity
- Control via the web-based GUI, COHESIONUI or SCPI commands
- Compact and portable design saves benchtop space

## Notes

1. Specifications are valid at $23^{\circ} \mathrm{C} \pm 3^{\circ} \mathrm{C}$
2. Excluding connectors. Add 0.2 dB for SMF ( 0.1 dB for MMF) per connector
3. Power off isolation is same as crosstalk
4. Repeatability is defined after 100 cycles
5. IL is measured at 850 and $1310 \mathrm{~nm}, 23^{\circ}$
6. IL is measured at 850 and $1270-1411 \mathrm{~nm}, 23^{\circ}$
7. IL is for single-band. Dual-band option adds 0.3 dB
8. With FC/APC connectors
9. Preliminary specs
10. Multimode products are tested and calibrated using mode-conditioning setups defined in TIA EIA-455-43 FOTP-43 for Output Near-Field Radiation Patterns.

## This product comes with a standard 1 year warranty.

With an extended warranty and calibration plan you'll spend more time focused on your priorities and less time worrying about maintenance.

Your choice: add a 3 or 5 year extended warranty when you buy.

## Guarantee performance

Ensure your equipment is operating at the best it can be for reliable and accurate results.

## Lower cost of ownership

Lock in savings and maximise your testing budget with a lower base cost of ownership.

Peace of mind
Spend less time worrying about maintenance and more on generating results.

## Order a calibration plan when purchasing your Quantifi Photonics instruments and get additional discounts.

10\% Discount

On calibrations ordered at the time of purchase.

25\% Discount
Add on an extended warranty and receive a $25 \%$ discount on calibrations.

Over time and with regular use, all optical parts and connectors require re-calibration and maintenance to guarantee accurate and reliable performance. We recommend Quantifi Photonics optical instruments are recalibrated every 12 months. With an instrument calibration performed by Quantifi Photonics technicians you receive:

- Comprehensive calibration to factory specifications
- End-to-end inspection to ensure all instrument functions are working and connectors are clean
- Firmware, software and documentation updates
- Certificate of calibration which includes detailed test results

# Our portfolio of optical \& electro-optical test modules is rapidly expanding to meet a wide range of customer requirements and applications. 

Tunable Laser Sources
Versatile telecom laser sources with full tunability across C or L bands. Narrow 100 kHz linewidth, up to 16.5 dBm of power, optional whisper mode to disable frequency dither.

Superluminescent Diode Broadband Light Source
Super-luminescent LED light source with high output power, large bandwidth and low spectral ripple and various wavelengths.

Polarization Controller \& Scrambler

High-speed automated polarization control with broad wavelength coverage from 1260 nm to 1650 nm , low insertion loss and back reflection. Full remote control via intuitive GUI, LabVIEW or SCPI.

Optical Spectrum
Analyzer (OSA)
Cost-effective, spectral measurement in a compact module with built-in analysis for: SMSR, OSNR \& spectral width. Targeted wavelengths for specific applications in O band, C band $\& \mathrm{~L}$ band.

Photonic Doppler Velocimeter (PDV)
Purpose-built module for Photonic Doppler Velocimetry (PDV). A circulator, two VOAs and a passive coupler all built into one compact module.

## $\square$

Fixed Wavelength Laser Sources

Highly customizable laser platform. Select required wavelength, power and fiber type for a customized solution.

Optical-to-Electrical Converter

High bandwidth, broadband O-to-E converter. Available in a range of configurations; choose from 1 or 2 channels, AC or DC coupling and various conversion gain and operating wavelength ranges.

## Optical Power Meters

Fast terminating or inline monitoring of optical signal power from - 60 to +10 dBm across 750 - 1700 nm wavelengths. Model with logarithmic analog output for applications such as silicon photonics fiber alignment.

## Passive Component Integration

Integrate passive optical components of your choice such as WDM couplers, splitters, band-pass filters, PM beamsplitters and circulators. Models support SMF, MMF and PMF.

## Optical Switch

Proven reliability and fast switching time. Wide variety of switch onfigurations: $1 \times 4$, 1x16, $16 \times 16$ and more. Models support SMF, MMF and PMF.
 Variable Optical
Attenuator (VOA)

Fast attenuation speed with low insertion loss and built-in power monitoring. Operates in fixed attenuation or constant output power modes. Models support SMF, MMF and PMF connector types.

## 4-

## Bit Error Rate Tester (BERT)

4 or 8-channel Pulse Pattern Generator and Error Detector at rates up to 29 Gbps for the design, characterization
 and production of optical transceivers and opto-
electrical components. transceivers and opto-
electrical components.

Passive Component Storage

Protect and store your own
 passive fiber optic components such as splitters, connector adaptor patchcords, WDM couplers, and isolators in one handy module.

## 

## Swept, Tunable Continuous Wave Laser

Swept, tunable continuous wave (CW) laser source with 0.01 dB power stability and $400 \mathrm{~nm} / \mathrm{s}$ high-speed scan rate for R\&D
 and production testing.

## Test. Measure. Solve.

Quantifi Photonics is transforming the world of photonics test and measurement. Our portfolio of optical and electrical test instruments is rapidly expanding to meet the needs of engineers and scientists around the globe. From enabling ground-breaking experiments to driving highly efficient production testing, you'll find us working with customers to solve complex problems with experience and innovation.
